

LOCAL RETAIL SALES

Sales Volume Increased 4.5 Per Cent

After adjusting for the retail sales rate of inflation, measured at 1.2 per cent in February, the overall volume of retail sales increased 4.5 per cent when compared to February 2020. This growth was attributed mostly to increased spending on-island by

residents. In value terms, retail sales rose 5.8 per cent to an estimated \$87.5 million.

Five of the seven retail sectors recorded higher sales volumes with Liquor Stores recording the largest volume increase of 20.4 per cent.

Excluding Sundays, there were 24 shopping days, one less than February 2020.

The Retail Sales Index (RSI) is based on a matched sample of reporting local retail stores. The sales data are collected from these stores via a monthly mail survey.

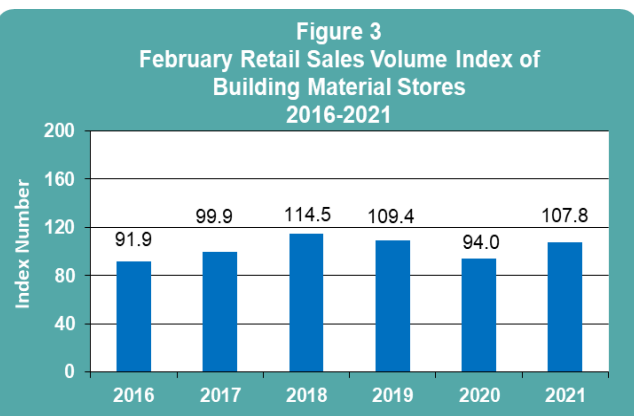

NOTE: Data on selected overseas declarations have been expanded as of December 2018 to show categories that represent a combination of goods purchased directly from overseas, online shopping, gifts, etc. In September 2019, the total selected overseas declarations and annual percentage change were added.

Liquor and Food Stores

The sales volume of Liquor and Food Stores increased 20.4 and 4.1 per cent, respectively. In value terms, the sales for Liquor Stores rose 22.8 per cent while Food Stores rose 5.5 per cent. The growth in sales was due to an increase in residents dining from home.

Building Material Stores

Sales at Building Material Stores increased 14.7 per cent in both volume and value terms. Increased demand for home improvement and large customer projects continued to impact the rise in sales.

All Other Store Types

During February 2021, the sales volume for the All Other Stores Types rose 8.9 per cent. In value terms, sales for this sector increased 11.2 per cent. The sales for marine and boat suppliers rose substantially due to increased sales of boats and boat supplies. The sales value of furniture, appliances and electronics grew 12.6 per cent due to residents purchasing more of these items locally versus overseas. Gross receipts from the sale of miscellaneous goods increased 25.3 per cent due mostly to a rise in jewellery sales. In contrast, the sales value for pharmacies fell 2.7 per cent.

Apparel Stores

The sales volume for Apparel Stores increased 5.0 per cent. In value terms, sales for Apparel

Stores rose 6.4 per cent. The sales performance amongst retailers was mixed. Retailers that reported increased sales attributed this growth to residents choosing to purchase locally due to less overseas travel. In contrast, other retailers experienced declines in local sales due to residents directly importing clothing from overseas vendors.

Service Stations

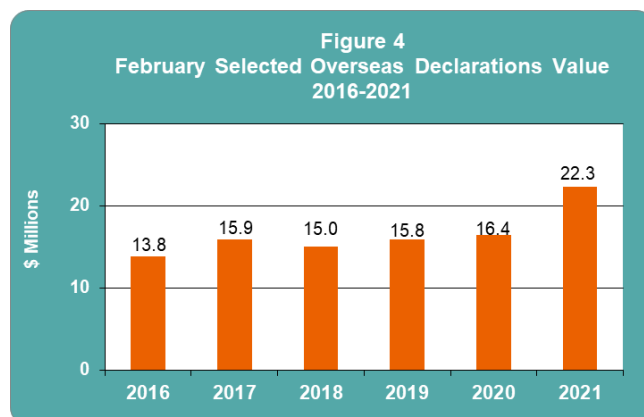

The volume of sales for Service Stations decreased 4.1 per cent year-over-year. The value of sales declined 3.4 per cent reflecting restricted business hours due to curfew restrictions and fewer vehicles in transit as residents continued to work from home.

Motor Vehicle Stores

The Motor Vehicle Stores sales volume decreased by 14.5 per cent in February 2021. In value terms there was a 14.9 per cent decline due to fewer sales of cars and motorcycles.

Selected Overseas Declarations (Value)*

Year-over-year, imports via courier increased \$2.2 million to \$13.5 million due to greater imports of clothing and footwear. Imports by households via sea rose \$6.3 million to \$7.6 million as a result of higher imports of clothing, furniture, machinery, appliances and electrical equipment. Declarations at the airport by returning residents fell \$2.6 million to \$0.8 million. Imports via the Bermuda Post Office remained the same at \$0.4 million.

^R Represents revised

EXPLANATORY NOTES

The RSI was first developed in 1982. It is a key economic indicator used to assess the current performance of sales activity in the local retail sector of the economy.

The RSI is a self-weighting index. This means that stores reporting a large value of sales have a greater impact on the movement of the index than stores reporting a low level of sales activity.

The RSI serves to:

- 1) measure monthly and annual movements of retail sales
- 2) provide an estimated gross turnover of sales in the local retail sector
- 3) act as a barometer of change in the level of demand for both the domestic and tourist markets

The index is structured into seven broad sectors:

- Food Stores
- Liquor Stores
- Motor Vehicle Dealers
- Service Stations
- Building Materials
- Apparel Stores
- All Other Store Types

Total retail stores across the seven sectors represent roughly 70% of all retail activity on the Island. The base period 2015 recorded a gross turnover in retail sales of \$1.1 billion.

Retail outlets that participate in the retail sales survey and trade in similar types of goods are grouped into these seven sectors. It is important to note that sector classifications are not interchangeable with commodity classifications. This is because most retail outlets sell several kinds of commodities. The sector classification reflects generally the individual commodity or the commodity group, which is the primary source of the establishment's receipts, or some mixture of commodities, which characterizes the establishment's business.

CONCEPTS AND DEFINITIONS

Base Period

This is the time period used as a reference point for measuring the shift in the value of retail sales. The base period for the Bermuda RSI is 2015.

Estimated Gross Turnover

Estimated gross turnover is the total value of retail sales generated in the retail sector. It is calculated by applying the all-items index number for the current month to the average monthly sales figure determined in the base year.

Gross Sales

Gross sales (volume and value) are sales for which no deductions have been made for the return of merchandise, allowances and discounts.

Retail Establishment

Retail trade is the sector of the economy that includes establishments that are engaged in the sale of merchandise for personal or household consumption and in the rendering of services that are incidental to the sale of the merchandise.

Selected Overseas Declarations

Overseas declarations reflect the value of goods declared, whether for personal or business use, by returning residents via the airport, imports via couriers, imports via the Bermuda Post Office and the value of non-commercial imports by households via sea.

Value Sales

The dollar value of a quantity of goods and services sold for cash or credit. Sales include the amounts received from customers for: immediate and layaway purchases; rentals; installations; maintenance; repairs and alterations.

Volume Sales

The dollar value of a quantity of goods and services sold at current retail market prices adjusted to eliminate the effect of price change.
