Department of Planning

Planning Guidelines for Hurricane Repairs

The Department of Planning knows you want to repair any damage to your property caused by the recent passing of storms as soon as possible. The Department of Planning technical officers are available to assist.

Repairs to Buildings

Like for like repairs of windows, doors and roof slate will not require planning permission or a building permit if the damage is limited to non-structural issues. Owners can proceed immediately with these types of repairs as soon as it is feasibly possible.

Repairs to buildings that received structural damage as a result of the hurricane may only commence following the receipt of a building permit from the Department of Planning. These applications will be given priority and will be processed expeditiously. The Department can allow for dangerous structural repairs to commence without a permit **as long as we are made aware** and structural details are submitted as an application as expeditiously as possible following commencement of work.

Class IV of the Development and Planning (General Development) Order 1999 says that a Permitted Development Permit can be used for damages caused by storms and fire provided that no more than 60% of the building/structure has been destroyed and that the replacement is not greater than the existing building/structure.

Please review the General Development Order / Permitted Development Permit [Guidance Note](#) for more information:

For building permit information, please contact Miglena Yaneva on 246-7913 or myaneva@gov.bm
For development application information, please contact Paul McDonald on 444-0917 or pamcdonald@gov.bm

Repairs to Listed Buildings

Repairs to Listed Buildings or buildings located within Historic Protection Areas that received **structural damage** as a result of the hurricane may only commence following receipt of a building permit from the Department. All such permit applications will be expedited by the Department.

Repairs to a Listed Building damaged as a result of the storm “like-for-like” details and materials will not require planning permission or a building permit if the damage is limited to non-structural issues. Owners can proceed immediately with repairing items such as windows, doors and roof slate with identical materials to replicate the style and detailing of the original structure.

Please review [Guidance Note 203](#) for more information.

Department of Planning

Repairs for Damaged Sea Walls and Docks

Seawalls and docks to be replaced will ordinarily require a building permit only. This is to ensure that the replacement structures meet the Bermuda Building Code 1998 and are structurally sound. Since seawalls and docks can have a negative impact on the natural foreshore both physically and visually, planning permission may be required in some instance. Prior to considering any repair works the Department of Planning should be consulted.

Assistance, information and clarification of the requirements should be directed to the Department of Planning at 297-7756. For the most up to date information, visit the Department's [website](#):

Building Control Contact List

Miglana Yaneva	Building Control Officer	myaneva@gov.bm	246-7913
Aidan Stones	Asst. Building Control Officer	atstones@gov.bm	444-0922
Melvin Holdipp	Building Inspector	maholdipp@gov.bm	734-4537
Damon Walker	Building Inspector	djwalker@gov.bm	337-5524
Vernon Trott	Electrical Inspector	vetrott@gov.bm	734-4539
Victor Cann	Electrical Inspector	vccann@gov.bm	734-4538
