

ANNEX C – SCOPE OF WORKS AND STATEMENT OF REQUIREMENTS

1. Background:

The Department of Works and Engineering, Ministry of Public Works & Environment, is responsible for procuring & hiring all types of vehicles & equipment for the Government fleet.

One (1) brand-new, unused Thermoplastic Paint Pre-Heater Kettle Truck with a total melting capacity up to 4,000 lbs is required for Road Marking.

2. Scope of Work:

- Supply of one (1) Kettle Truck as detailed in Section 2.1 below.

2.1 Technical Requirements of the Vehicle

2.1.1 Bermuda Transport Control Department Class Requirements –

- Must comply with all existing Bermuda Transport Control Department Class Requirements
- Truck must not exceed the following:
 - Engine capacity not exceeding 6,000 c.c.'s
 - Length overall not exceeding 260 inches
 - Width overall not exceeding 94 inches
 - Height overall not exceeding 134 inches
 - Gross weight (fully loaded) not exceeding 36,000 lbs.

2.1.2 Specific Requirements –

- Two (2) skid-mounted pre-melting thermoplastic kettles (4,000 lbs. total melting capacity), diesel fired, air-jacketed, on cab over chassis; Bluetooth for Hands Free Communication and Navigation; tow hitch; with On-island training and spare parts for kettles.
- Chassis must be either Isuzu or Peterbilt

2.1.3 Cosmetic Requirements –

- Vehicle to be Yellow or White with reflective tape for road and user safety

Note:

Multiple submissions for different options of Vehicles are accepted.

However, each proposal will be required to have an individual Pricing Schedule and Vehicle Submission Form.
