

# **RETAIL SALES INDEX**

**MARCH 2021** 

## **LOCAL RETAIL SALES**

# Sales Volume Increased 7.7 Per Cent

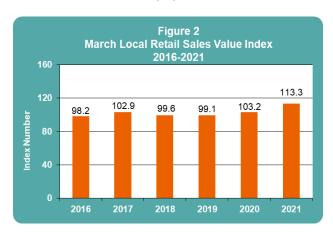

After adjusting for the retail sales rate of inflation, measured at 1.9 per cent in March, the overall volume of retail sales increased 7.7 per cent when compared to March 2020. This growth was attributed mostly to increased spending on-island by

residents. In value terms, retail sales rose 9.8 per cent to an estimated \$105.7 million.

Six of the seven retail sectors recorded higher sales volumes with Motor Vehicle Stores recording the largest volume increase of 117.7 per cent.

Excluding Sundays, there were 27 shopping days, one more than March 2020.

The Retail Sales Index (RSI) is based on a matched sample of reporting local retail stores. The sales data are collected from these stores via a monthly mail survey.

NOTE: Data on selected overseas declarations have been expanded as of December 2018 to show categories that represent a combination of goods purchased directly from overseas, online shopping, gifts, etc. In September 2019, the total selected overseas declarations and annual percentage change were added.

## **Motor Vehicle Stores**

The Motor Vehicle Stores sales volume rose by 117.7 per cent in March 2021. In value terms there was a 116.4 per cent rise due mostly to increased inventory of vehicles available for sale.

# **Apparel Stores**

The sales volume for Apparel Stores increased 72.2 per cent. In value terms, sales for Apparel Stores rose 74.4 per cent. The increase was due to retailers being open for more days this year compared to store closures after the onset of the COVID-19 pandemic during March 2020.

# **Building Material Stores**

Sales at Building Material Stores increased 26.3 per cent in volume. In value terms, sales grew 26.4 percent. Increased contract sales and large customer projects contributed to the rise in sales.

## **All Other Store Types**

During March 2021, the sales volume for the All Other Stores Types rose 22.4 per cent. In value terms, sales for this sector increased 24.6 per cent. The sales for marine and boat suppliers rose more than five-fold due to sales of boats, boat engines and other parts. The sales value of furniture, appliances and electronics grew 20.7 per cent due to residents purchasing more of these items locally versus overseas. Gross receipts from the sale of miscellaneous goods increased 114.3 per cent due mostly to a rise in jewellery sales. In contrast, the sales value for pharmacies fell 2.3

per cent.

# **Liquor and Food Stores**

The sales volume of Liquor Stores increased 13.1 per cent while the sales volume of Food Stores decreased by 13.1 per cent. In value terms, the sales for Liquor Stores grew 13.6 per cent while Food Stores dropped by 11.4 per cent. Restaurants and bars were limited primarily to outdoor service during March 2021, resulting in increased purchases of liquor from stores for consumption at home. Food sales were comparatively lower than 2020 as households purchased in larger amounts last year due to initial uncertainty with the COVID-19 pandemic and the anticipation of government restrictions and stay-at-home orders.

# **Service Stations**

The volume of sales for Service Stations grew by 6.2 per cent. The value of sales rose 13.2 per cent which was due largely to a 6.6 per cent increase in fuel prices.

# Selected Overseas Declarations (Value)\*

Year-over-year, imports via courier increased \$0.4 million to \$13.9 million due to greater imports of clothing. Imports by households via sea rose \$7.2 million to \$8.6 million as a result of higher imports of furniture, machinery, appliances and electrical equipment. Declarations at the airport by returning residents fell \$0.9 million to \$1.0 million. Imports via the Bermuda Post Office rose \$0.2 million to \$0.4 million.

#### **EXPLANATORY NOTES**

The RSI was first developed in 1982. It is a key economic indicator used to assess the current performance of sales activity in the local retail sector of the economy.

The RSI is a self-weighting index. This means that stores reporting a large value of sales have a greater impact on the movement of the index than stores reporting a low level of sales activity.

The RSI serves to:

- measure monthly and annual movements of retail sales
- 2) provide an estimated gross turnover of sales in the local retail sector
- act as a barometer of change in the level of demand for both the domestic and tourist markets

The index is structured into seven broad sectors:

- Food Stores
- Liquor Stores
- Motor Vehicle Dealers
- Service Stations
- Building Materials
- Apparel Stores
- All Other Store Types

Total retail stores across the seven sectors represent roughly 70% of all retail activity on the Island. The base period 2015 recorded a gross turnover in retail sales of \$1.1 billion.

Retail outlets that participate in the retail sales survey and trade in similar types of goods are grouped into these seven sectors. It is important to note that sector classifications are not interchangeable with commodity classifications. This is because most retail outlets sell several kinds of commodities. The sector classification reflects generally the individual commodity or the commodity group, which is the <u>primary</u> source of the establishment's receipts, or some mixture of commodities, which characterizes the establishment's business.

## **CONCEPTS AND DEFINITIONS**

#### **Base Period**

This is the time period used as a reference point for measuring the shift in the value of retail sales. The base period for the Bermuda RSI is 2015.

### **Estimated Gross Turnover**

Estimated gross turnover is the total value of retail sales generated in the retail sector. It is calculated by applying the all-items index number for the current month to the average monthly sales figure determined in the base year.

### **Gross Sales**

Gross sales (volume and value) are sales for which no deductions have been made for the return of merchandise, allowances and discounts.

### Retail Establishment

Retail trade is the sector of the economy that includes establishments that are engaged in the sale of merchandise for personal or household consumption and in the rendering of services that are incidental to the sale of the merchandise.

### **Selected Overseas Declarations**

Overseas declarations reflect the value of goods declared, whether for personal or business use, by returning residents via the airport, imports via couriers, imports via the Bermuda Post Office and the value of non-commercial imports by households via sea.

### **Value Sales**

The dollar value of a quantity of goods and services sold for cash or credit. Sales include the amounts received from customers for: immediate and layaway purchases; rentals; installations; maintenance; repairs and alterations.

#### **Volume Sales**

The dollar value of a quantity of goods and services sold at current retail market prices adjusted to eliminate the effect of price change.
