

Ministry of Finance - Policy guidelines
Qualifying goods under CPC 4235

CPC 4235 (Personal protective equipment and supplies)

These policy guidelines are issued by the Minister of Finance in exercise of his authority under end-use duty relief CPC 4235.

Duty relief

Upon proper declaration, Customs will make duty relief available to all importers for personal protective equipment and supplies (PPE) under CPC 4235, subject to the following conditions:

1. PPE must be used only in connection with disease prevention and control (refer to “Disease prevention and control” below).
2. Only PPE certified by the Director of Health (the Director) will qualify for duty relief (refer to “Qualifying goods” below).

Disease prevention and control

Disease prevention and control measures include hand hygiene, wearing of personal protective equipment and use of waste management materials. Other measures include cleaning, disinfection (and sterilization, where applicable) of patient-care equipment and linen and cleaning and disinfection of the home, work and public environments. Such measures help to reduce the likelihood of healthcare workers and any other persons getting infected with a communicable disease. Such measures also help to reduce the likelihood of infected persons spreading communicable disease to others.
