

INFLATION RISES

Consumers paid 2.0 per cent more in February 2018 than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The level of inflation increased 0.4 percentage points from the 1.6 per cent measured in January 2018.

Between January 2018 and February 2018, the average cost of goods and services in the CPI increased 0.3 per cent. The all-items index rose to 104.1 in February. This means that the basket of goods and services that cost \$100.00 in April 2015 now costs \$104.10.

YEAR-TO-YEAR ANALYSIS

The Transport & Foreign Travel sector was the largest contributor to the year-over-year change in the CPI. This sector rose 4.2 per cent, fostered by a 14.4 per cent increase in the average cost in air fares.

In addition, the Tobacco & Liquor sector and the Fuel & Power sector rose 9.4 per cent and 9.1 per cent, respectively.

**Inflation
Rate
2.0%**

The compilation of the CPI involves the processing of several thousand price quotations. The Department of Statistics wishes to acknowledge the cooperation of the business community in supplying the required price data.

MONTH-TO-MONTH ANALYSIS

Transport & Foreign Travel

The Transport & Foreign Travel sector rose 2.6 per cent in February. Increases were reported in the average cost of air fares (+11.9 per cent), and overseas hotels (+1.7 per cent).

Household Goods, Services & Supplies

After a 0.1 per cent decline in January, the Household Goods, Services & Supplies sector rebounded in February (+0.2 per cent). The leading factor behind the rise was the increase in the average cost of cellular phones (+16.3 per cent).

Rent

The Rent sector reported no price movement in February.

Health & Personal Care

The Health & Personal Care sector remained unchanged for the fourth consecutive month.

Clothing & Footwear

The Clothing & Footwear sector reported no change for the month.

Fuel & Power

After declining 1.5 per cent in January, the Fuel & Power sector reported no price movement in February.

Tobacco & Liquor

The Tobacco & Liquor sector was unchanged for the month. The average cost of wines (+0.1 per cent) was offset by the average cost of beer (-0.1 per cent).

Education, Recreation, Entertainment & Reading

The Education, Recreation, Entertainment & Reading sector recorded a 0.1 per cent decline in February. The average cost of televisions dropped 8.0 per cent.

Food

Following a 1.2 per cent increase in January, the Food sector slipped 0.7 per cent in February. Price decreases were reported in the average cost of oranges (-6.4 per cent), cantaloupes (-3.3 per cent) and cooking oil (-2.9 per cent).

COMPUTING PRICE INCREASES

The Department of Statistics receives calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website www.gov.bm.

A) Month-to-Month Price Change

The price change between November and October, 2015 is calculated as follows:

$$= \frac{\text{Nov 15 index} - \text{Oct 15 index}}{\text{Oct 15 index}} \times 100$$

$$= \frac{100.5 - 100.6}{100.6} \times 100$$

$$= -0.1\%$$

B) Year-to-Year Price Change

The price change between December 2015 and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 15 index} - \text{Dec 14 index}}{\text{Dec 14 index}} \times 100$$

$$= \frac{100.5 - 98.7}{98.7} \times 100$$

$$= 1.8\%$$

C) Particular Period Price Change

The price change between April 2014 and January, 2016 is calculated as follows:

$$= \frac{\text{Jan 16 index} - \text{Apr 14 index}}{\text{Apr 14 index}} \times 100$$

$$= \frac{100.3 - 98.3}{98.3} \times 100$$

$$= 2.0\%$$

BERMUDA CONSUMER PRICE INDEX

WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organized first by commodity type. They are then divided into sub-components and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Foreign Travel
- Household Goods, Services & Supplies
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

CONCEPTS AND DEFINITIONS

Base Period

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

Price Index Number

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 97.2 for January 2014 with 100.4 for January 2016, reveals that prices have increased by 3.3 percent.

Laspeyres Equation

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item’s price change compared to the overall change in the sector or CPI.

Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

Cost of Living Index

Many individuals refer to the CPI as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

	2014	2015	2016	2017	Feb 18
Bermuda	2.0	1.5	1.5	1.9	+2.0
United States¹	0.8	0.7	2.1	2.1	+2.2
Canada²	2.0	1.1	1.4	1.6	+2.2
United Kingdom³	2.4	1.0	1.8	3.6	+3.6
