COVID-19 Guidance for Tourist Accommodations in Bermuda

As of 1st July 2020, commercial airlines were welcomed to Bermuda. Due to the COVID-19 pandemic, the Bermuda Government has put in place traveller protocols, which include the requirement for both visitors and residents to apply for a Travel Authorisation and to quarantine upon arrival. **For more information about these requirements visit:** <https://www.gov.bm/coronavirus-travellers>

What must guests do while in Bermuda?

Visitors arriving in Bermuda must quarantine until they receive the results of their arrival PCR COVID-19 test (between 6 to 8 hours after arrival if during the day). There will be testing requirements, which will be outlined on <https://www.gov.bm/coronavirus-travellers>

Every day, twice a day, they must also record their symptoms and temperature for up to 14 days. If they have a temperature over 100.4 F or 38C, they should contact a health official on covid19surv@gov.bm or the hotline on +1(441) 444-2498.

What does quarantine mean?

Quarantine is used to prevent the possible spread of an infectious disease. Quarantine means that a person with no symptoms must stay in their home or accommodation and keep two metres (six feet) away from others.

What is isolation?

Individuals are isolated when they have tested positive for COVID-19 or have symptoms, including fever and cough. Isolated people *must* stay at in the room at their accommodation (or in hospital, if critically ill) and can have limited contact with others.

Isolation vs. Quarantine

To clarify, when a person is quarantined, they don't have symptoms, but are separated from others. When a person is isolated, they have symptoms and are kept away from others. Both of these measures are used to prevent the spread of an infectious disease.

What should guests avoid while quarantined?*

If a guest is quarantined, they should not leave their room. **This means they should NOT:**

- Use shared facilities e.g. laundry, ice machines, and corridors.
- Go to the bar or restaurant
- Be in public areas
- Enter swimming pools
- Wander the halls
- Go to the spa
- Go to the beach
- Work out at the gym
- Go to the laundry

**not a full list, but examples of typical areas at hotels which guests should avoid*

What can guests do while quarantined?

Depending on the nature of their work, guests can work from their room. They can be in contact with their office and colleagues by phone, email, video conferencing and other online channels.

Guests may communicate with family and friends by phone, email, through social media and other online methods.

If their room has a balcony, they can sit outside if there are no other people in the immediate area. They must be two metres (six feet) from others.

Things to consider when operating a tourist accommodation during the COVID-19 pandemic

1. Ensure the accommodation has a plan in place for a guest to quarantine and/or isolate. For example, is there a separate entrance? How will arriving guests keep their distance from other guests, household members or staff? How will you check-in your guests while maintaining strict physical distancing?

A shared home vacation rental is particularly high risk at this time and will make quarantine or isolation of guests more problematic.

2. Put in place an appropriate cleaning schedule for the unit by a professional or trained cleaner. Review requirements for cleaning [with a case or without a known case of COVID-19](#). See also the Self-Catering Accommodation Cleaning Checklist in [Annex I](#). [*Hotel Cleaning Checklist is in development*].
3. Implement extended periods between guests to ensure proper cleaning—4 hours is the minimum time but 12 to 24 hours is preferred.
4. Have plans in place in the event you may need to cancel future guests due to a current guest testing positive for COVID-19.
5. Consider the financial liabilities if a guest must remain in your accommodation for an extended period (at least 14 days from their positive test) if they test positive for COVID-19. How will you be compensated by the guest?
6. When arriving guests quarantine or must isolate how will those rooms be identified so staff are aware? Will you use a sticker? A room chart?
7. How will you communicate with your guests if problems arise? Is it by phone only?
8. Identify the guidance you will provide guests to ensure they are aware of their responsibilities for hygiene, mask wearing and physical distancing while staying in your property and Bermuda.

How can I, as a tourist accommodation operator, assist guests under quarantine or in isolation?

If a guest needs support, such as necessary items and supplies to be bought, where possible, the tourism accommodation can make practical arrangements or direct them how to acquire the items online or by phone. Purchases should be left outside the guest's room and the guest notified the item is outside their door. Staff should not touch the guest and must stay two metres (six feet) away.

When room service is ordered, the tray should be left outside the door and the guest notified. Guests may also order from grocery stores and restaurants which use delivery services. You may wish to prepare a list of these services for your guests for their ease and to reduce your interaction with the guest.

If it is absolutely necessary to enter the room when the guest is present (e.g. a plumbing or electricity issue), 6ft of distance must be maintained and masks must be worn by all persons.
