

Issue Brief: Bermuda Health Strategy Update Survey

15th January 2020

NEED TO KNOW

The Ministry of Health has commenced an update to the Bermuda Health Strategy 2020-2025. We are determined to make Bermuda healthier and we need a joint vision for health that inspires hope, trust and confidence across the community.

As part of building a joint vision, we are seeking your views, as a healthcare professional in Bermuda, about the current and desired future state of healthcare in Bermuda.

We are working with KPMG to gather this feedback. KPMG leverage a Global Care System Redesign (CSR) approach that looks at how models of care are designed, paid for and provided across a defined geographical area. KPMG's work across the globe shows that there are 9 traits which describe 'what good' looks like. The survey aligns to those traits and will help us measure where we are now and where we need to be.

We value your input and would appreciate it if you could make every effort to complete this [survey](#) by **31 January 2020**.

NEXT STEPS

Take the [Provider Survey](#) now. The deadline is **31 January 2020**.

In addition to this [survey](#), which is designed to gather the views of healthcare professionals, KPMG is conducting a separate survey for the public through the forum.gov website.
