

RETAIL SALES ROSE 9.1 PER CENT

Due primarily to the 35th America's Cup, retail sales in June 2017 increased 9.1 per cent above the \$102.8 million recorded in June 2016. All retail sectors experienced increases in sales revenue, with the exception of motor vehicle stores which declined 25.4 per cent. The 'apparel stores' category recorded the largest increase in sales receipts of 33.6 per cent.

Returning residents declared overseas purchases valued at \$3.8 million, which was 7.3 per cent lower than June 2016. This contributed to a combined local and overseas spending of \$116.0 million.

After adjusting for the annual retail sales rate of inflation, measured at 1.4 per cent in June, the volume of retail sales increased 7.6 per cent.

Excluding Sundays, there were 25 shopping days during the month, the same as June 2016.

The Retail Sales Index (RSI) is currently based on a matched sample of reporting retail stores. The sales data are collected from these stores through a monthly mail survey. The Department of Statistics wishes to acknowledge the continuous support of the business community in supplying the required sales data.

SUMMARY STATISTICS

June	120.2	+9.1	+7.6	112.2	3.8	-7.3	116.0	+8.5

Apparel Stores

During June 2017, sales revenue for apparel stores was 33.6 per cent higher year-over-year as many retailers experienced a boost from greater tourist demand and sales of America's Cup merchandise. After adjusting for inflation, the sales volume for apparel stores increased 30.9 per cent.

Liquor and Food Stores

Receipts from liquor sales increased 19.4 per cent while food sales were 10.4 per cent higher year-over-year. Retailers attributed the increase to demand from visiting boats and yachts. In volume terms, sales of liquor and food stores were 14.2 and 6.6 per cent higher, respectively.

Service Stations

The value of sales for service stations increased 16.7 per cent when compared to June 2016. The increase in revenue was attributed partly to a 2.6 per cent increase in the price of fuel as well as increased sales relating to the America's Cup. After adjusting for inflation, the sales volume of fuel rose 13.7 per cent.

Building Material Stores

Receipts from the sale of building materials increased 6.0 per cent in both value and volume terms. The rise in sales receipts was a result of a greater demand for supplies for building projects.

All Other Store Types

Sales receipts for the all other store types sector were 4.7 per cent higher year-over-year. Gross receipts for other miscellaneous sales rose 7.9 per cent, while pharmacies reported 7.6 per cent higher sales revenue. Receipts for the sale of furniture, appliances and electronics increased 3.5 per cent. In contrast, marine and boat suppliers reported 4.8 per cent lower sales revenue. After factoring for inflation, the sales volume of the all other store types category increased 4.6 per cent.

Motor Vehicle Stores

Motor vehicle retailers registered a 25.4 per cent drop in sales receipts. The decline was as a result of a 25.8 per cent decrease in the sales volume.

Resident Purchases Overseas

Residents declared \$3.8 million in overseas purchases during the month, 7.3 per cent less than June 2016.

(2) Includes household supplies but excludes alcoholic beverages

*The yearly series reflect annual changes.

(3) Does not include sales to bars, clubs, hotels and restaurants

EXPLANATORY NOTES

The **Retail Sales Index (RSI)** was first developed in 1982. It is a key economic indicator used to assess the current performance of sales activity in the retail sector of the economy.

The RSI is a self-weighting index. This means that stores reporting a large value of sales have a greater impact on the movement of the index than stores reporting a low level of sales activity.

The RSI serves to:

- 1) measure monthly and annual movements of retail sales
- 2) provide an estimated gross turnover of sales in the local retail sector
- 3) act as a barometer of change in the level of demand for both the domestic and tourist markets

The index is structured into seven broad sectors:

- Food Stores
- Liquor Stores
- Motor Vehicle Dealers
- Service Stations
- Building Materials
- Apparel Stores
- All Other Store Types

Total retail stores across the seven sectors represent roughly 70% of all retail activity on the Island. The base period 2015 recorded a gross turnover in retail sales of \$1.1 billion.

Retail outlets that participate in the retail sales survey and trade in similar types of goods are grouped into these seven sectors. It is important to note that sector classifications are not interchangeable with commodity classifications. This is because most retail outlets sell several kinds of commodities. The sector classification reflects generally the individual commodity or the commodity group, which is the primary source of the establishment's receipts, or some mixture of commodities, which characterizes the establishment's business.

CONCEPTS AND DEFINITIONS

Retail Trade

Retail trade is the sector of the economy that includes establishments that are engaged in the sale of merchandise for personal or household consumption

and in the rendering of services that are incidental to the sale of the merchandise.

Retail Establishment

A retail establishment is one that operates at a fixed place of business and is engaged in sales activities to attract the general public to buy merchandise.

Value Sales

The dollar value of a quantity of goods and services sold for cash or credit. Sales include the amounts received from customers for: immediate and layaway purchases; rentals; installations; maintenance; repairs and alterations.

Gross Sales

Gross sales are sales for which no deductions have been made for the return of merchandise, allowances and discounts.

Volume Sales

The dollar value of a quantity of goods and services sold at current retail market prices adjusted to eliminate the effect of price change.

Estimated Gross Turnover

Estimated gross turnover is the total value of retail sales generated in the retail sector. It is calculated by applying the all-items index number for the current month to the average monthly sales figure determined in the base year.

Base Period

This is the time period used as a reference point for measuring the shift in the value of retail sales. The base period for the Bermuda RSI is 2015.

Overseas Purchases

Overseas purchases reflect the value of goods declared by residents through HM Customs while travelling on vacation or business trips.
