

INFLATION INCREASES

Consumers paid 1.4 per cent more in November 2015 than they did a year ago for the basket of goods and services included in the Consumer Price Index (CPI). The level of inflation rose 0.8 percentage points from the 0.6 per cent measured in October 2015.

Between October 2015 and November 2015, the average cost of goods and services in the Consumer Price Index declined 0.1 per cent. The all-items index fell to 100.5 in November. This means that the basket of goods and services that cost \$100.00 in April 2015 now cost \$100.50.

YEAR-TO-YEAR ANALYSIS

The Health & Personal Care sector was the largest contributor to the year-over-year increase, rising 7.0 per cent. The major driver in this sector was the cost of insurance premiums and prescribed medicines.

The Household Goods, Services & Supplies and Food sectors also had a large impact in the year-over-year increase. Price shifts in this sector increased 2.9 and 1.6 per cent, respectively.

Inflation Rate
1.4%

The compilation of the CPI involves the processing of several thousand price quotations. The Department of Statistics wishes to acknowledge the cooperation of the business community in supplying the required price data.

SUMMARY STATISTICS					
Period	Monthly		Period	Quarterly	
	Index	Annual per cent Change		Index	Annual per cent Change
2014			2013		
Nov	99.1	+2.3	Q1	95.7	+2.0
Dec	98.7	+1.5	Q2	96.6	+1.8
			Q3	97.0	+1.7
2015			Q4	97.2	+1.6
Jan	98.6	+1.4	2014		
Feb	98.9	+1.6	Q1	97.5	+1.8
Mar	99.1	+1.2	Q2	98.5	+2.0

Jun	100.7	+2.1	2015		
Jul	100.6	+1.9	Q1	98.9	+1.5
Aug	100.4	+1.4	Q2	100.2	+1.7
Sep	100.7	+1.0	Q3	100.6	+1.5
Oct	100.6	+0.6			
Nov	100.5	+1.4			

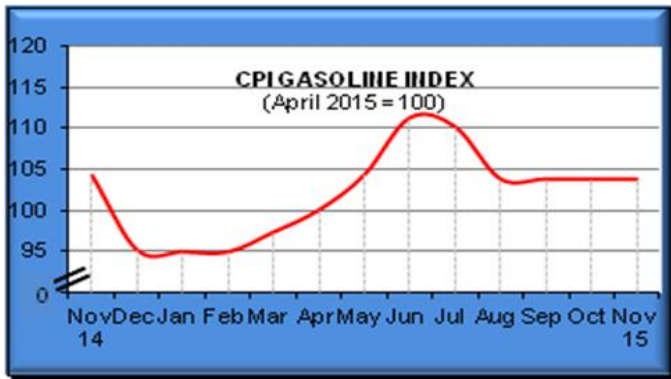

MONTH-TO-MONTH ANALYSIS

Rent

The Rent sector was unchanged in November, despite rental units subject to rent control increasing 0.1 per cent.

Transport & Foreign Travel

The Transport & Foreign Travel sector increased 0.1 per cent in November. The average cost of automobiles fell 1.0 per cent. However, the price of airfares rose 2.4 per cent.

Health & Personal Care

The Health & Personal Care sector was static in November.

Clothing & Footwear

There was no movement in the Clothing & Footwear sector for the fourth consecutive month.

Tobacco & Liquor

The Tobacco & Liquor sector was static in November as it was in October.

Education, Recreation, Entertainment & Reading

After two months of upward movement, the Education, Recreation, Entertainment & Reading sector reported no changes for the month.

Household Goods, Services & Supplies

The Household Goods, Services & Supplies sector was static in November. The average cost of communications equipment fell by 2.8 per cent. In contrast, there was an increase in the average cost of stoves (+1.7 per cent) and washers & dryers (+1.0 per cent).

Food

The Food sector dropped 0.5 per cent in November, following a 0.2 per cent increase in October. Leading factors behind the decrease were the average price of fresh ground beef (-4.3 per cent), fresh carrots (-3.8 per cent) and salad dressing (-3.4 per cent).

Fuel & Power

The Fuel & Power sector declined 1.3 per cent in November as the fuel adjustment rate fell 4.0 per cent.

COMPUTING PRICE INCREASES

The Department of Statistics receives numerous calls daily requesting the rate of inflation over specific periods of time. The following calculations are provided to guide users as to how to compute rates of price increases. The monthly index numbers can be obtained from our website www.statistics.gov.bm.

A) Month-to-Month Price Change

The price change between November and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 14 index} - \text{Nov 14 index}}{\text{Nov 14 index}} \times 100$$

$$= \frac{99.1 - 99.6}{99.6} \times 100$$

$$= -0.5\%$$

B) Year-to-Year Price Change

The price change between December 2013 and December, 2014 is calculated as follows:

$$= \frac{\text{Dec 14 index} - \text{Dec 13 index}}{\text{Dec 13 index}} \times 100$$

$$= \frac{99.1 - 97.6}{97.6} \times 100$$

$$= 1.5\%$$

C) Particular Period Price Change

The price change between February 2013 and January, 2015 is calculated as follows:

$$= \frac{\text{Jan 15 index} - \text{Feb 13 index}}{\text{Feb 13 index}} \times 100$$

$$= \frac{99.1 - 96.2}{96.2} \times 100$$

$$= 3.0\%$$

BERMUDA CONSUMER PRICE INDEX

WHAT IS THE CONSUMER PRICE INDEX?

The Consumer Price Index (CPI) is a statistical tool used for measuring changes in the general level of prices of consumer goods and services purchased by private households.

The index measures price movements of a given quality and quantity of goods and services. The mix of these consumer goods and services comprising the index, are figuratively thought of as a “shopping basket.” In constructing this “shopping basket”, the selected goods and services are organized first by commodity type. They are then divided into sub-components and assigned to a major expenditure group. The Bermuda CPI is structured into nine expenditure groups or sectors:

- Food
- Rent
- Clothing & Footwear
- Tobacco & Liquor
- Fuel & Power
- Transport & Vehicles
- Household Goods, Services & Communications
- Education, Recreation, Entertainment & Reading
- Health & Personal Care

CONCEPTS AND DEFINITIONS

Base Period

The time period which is used as a reference point for measuring the price change of goods and services. The base period for the Bermuda CPI is April 2015.

Price Index Number

A single figure that shows how a set of prices has changed over a specified period of time. An index number on its own means nothing. It must be compared with an index number from another period to have meaning. For example, a comparison of the index number 79.1 for January 1998 with 82.9 for January 2000, reveals that prices have increased by 4.8 percent.

Laspeyres Equation

The CPI is computed using this statistical equation. This formula calculates the total amount of money a household needs today to purchase the same basket of goods and services that it bought in the base period, April 2015.

WEIGHTED AVERAGE

A mathematical formula that takes into account the relative importance of an item’s price change compared to the overall change in the sector or CPI.

Inflation

Inflation is the process of rising prices, resulting in diminishing purchasing power of a given sum of money.

Cost of Living Index

Many individuals refer to the Consumer Price Index (CPI) as a cost-of-living index. The CPI is an index of pure price change only. A cost-of-living index reflects the changes in buying or consumption patterns that consumers would ordinarily make to adjust to any change in the price of a good or service.

A COMPARISON OF RATES OF INFLATION (%) Selected Countries & Bermuda

	2011	2012	2013	2014	Nov 15
Bermuda	2.7	2.4	1.8	2.0	+1.4
United States¹	3.0	1.7	1.5	0.8	+0.5
Canada²	2.9	1.5	0.9	1.9	+1.4
United Kingdom³	5.2	3.2	3.0	2.4	+1.1
